Subject: WPA Cemetery Plan 15-209086-I14 for Grovesville Cemetery (Buxton)

Hello - I am researching the Owen family plot locations at Groveville Cemetery in Buxton. There are over 37 identified 'Owen' family members buried in the Groveville / Highland cemetery in Buxton. Many have documented military service.

The online copy of WPA Cemetery Plan 15-209086-114 (Adjutant General collection) 'may' have handwritten plot numbers, marker descriptions or annotated text in the older map section.

I could not determine if the suggested annotations appear on the **Map_Adj.Gen._York__Buxton__Groveville_Cemetery_209086** version available on your web archive.

Specifically, I'm requesting a lookup in the corresponding Office of the Adjutant General's master record folder or worker registration logs for the rows around 17 and 18 of that plan, where John Owen (Jr), Elijah JC and families are buried.

John Owen Sr's (b. 1747 d. 1826), a documented revolutionary war veteran, burial location is unknown. There appear to be unmarked spaces proceeding the markers for his son John Jr's family in that row - suggesting unmarked graves.

Could I request a high-resolution or high-contrast digital scan of this specific map sheet, and/or a check of the accompanying text ledger for this cemetery map folder?"

Comparing a high-contrast copy of the 1930's map version would allow comparison with the markers currently seen today (almost 100 years in time).

best regards, chris owen
